CALL FOR THE NEXT ISSUE

Articles / research papers, creative write-ups and book reviews related to English language and literature are invited for the next September 2022 issue.

Current English Review (CER) is a peer reviewed research journal. Author's name should appear on the home page only. The reviewer's name is withheld from the author and the author's name from the reviewer. Please cover any personal acknowledgements separately to the main text to facilitate anonymous peer review. Each manuscript is reviewed by at least two referees. All manuscripts are reviewed as early as possible, and an editorial decision is generally reached within 9-12 weeks of submission by the author. The decision of the Editor / Editorial Board is final. The Board has the right to condense or make necessary changes in the research papers.

Guidelines for Authors

- 1. Soft copies of articles/research papers (in 3000 words), Reports (in 500 words) Book-Reviews (in 500-600) words, language games/activities (in 300-400 words) should be sent along with a brief resume in about 25-30 words to the Editor.
- 2. A brief Abstract (maximum 250 words) should be provided along with 5-10 keywords. Manuscripts should be typed double-spaced on one side only on A4 paper with a 3 cm margin all round. Pages should be numbered consecutively throughout. A cover sheet should include author(s) name(s), affiliation, full postal address and email address, telephone numbers where possible. Manuscript (ideally as one single file with figures and tables included in the body of the text) in MS Word format by email attachment can be emailed to editorcer@chaitanya.edu.in and cduwarangal@gmail.com
- 3. No more than three levels of subheadings should be used; the first two levels should be numbered 1, 1.1, 1.2, 2, 2.1, and so on. Spelling should follow that of the Oxford English Dictionary. Endnotes, not footnotes, should be used. Quoted words or sections in running text should be in single quotes with double quotes within. Passages of more than 50 words should be indented. Please avoid the generic 'he' and the authorial 'we' (for T).
- 4. Articles should subscribe to the latest *MLA Handbook for Writers of Research Papers* (IX Edition, May 2021, available on Amazon Prime for \$8). The papers should be critical, original, analytical, scholarly and comprehensive.
- 5. Copyright and permissions: Unless otherwise agreed, it is the author's responsibility to acquire permissions for material for which they are not the copyright owners. This usually includes all extracts over 400 words, figures, tables, photographs, drawings, etc. Even very short extracts of poetry may need permission. Please bear in mind that just because text and images can be accessed freely on the Internet, it does not mean that they are free from Copyright. If in doubt, please contact the editor before submitting a final manuscript.
- 6. Funding: CJES requires all authors to acknowledge their funding in a consistent fashion under a separate heading in the Declaration as: This research received no specific grant from any funding agency in the public, commercial, or not-for-profit sectors.
- 7. Contributors should submit a declaration that the paper is original, does not violate copyright law and has not been published earlier in any form.
- 8. The final version of any manuscript submitted should be as far as possible in a publishable form i.e. references should have been checked and updated. All editing mark-ups, track changes, etc, should be turned off.
- 9. Soft copies of the proofs will be sent in PDF format to the corresponding author and they should be returned promptly. Authors are reminded to check their proofs carefully to confirm that all author information, including names, affiliations, sequence and contact details are correct, and that Funding and Conflict of Interest statements, if any, are accurate. Please note that if there are any changes to the author list (in case of multiple authors) at this stage all authors will be required to complete and sign on a form authorising the change.

- 10. Figures and tables: It is not always possible for figures, tables, maps, etc, to be positioned in exactly the same place in the journal as they are in the manuscript. Hence, it is important that they are all cited in the text. Unless arranged otherwise, all illustrations will be printed in black-and-white, so artwork incorporating colours is not normally appropriate in a printed copy. It is normally advisable to use shading or hatching rather than tints if it is possible. Coloured tints will all come out as grey, and even grey tints should normally be separated by at least 20%, 40% black, etc. The size of figures, and the type sizes used in them, should be appropriate to the book in which they are to be printed. Larger artwork is acceptable, but will be reduced to fit. Our preferred formats form aps and photographs are: .jpeg, .tiffor. Most programs give 'Save As' or 'Export' options into these formats. The resolution is an important consideration, as this needs to be at least 300 dpi for printing purposes.
- 11. References: References in the text of an article should be by the author's name and year of publication, as in these examples: Rajeshwar (2021) in a paper on ... [commonest version]; Rajeshwar and Damodar (2020c:33) state that ... [where page number is required]; Evidence is given by Rajeshwar et. al. (2021) ... [for three or more authors]. Further exploration of this issue may be found in many sources (e.g. Chari & Damodar, 2021; Deepa, 2018; Purushotham, 2017a) [note alphabetical order, use of '&' and semi-colons].
- 12. All references cited in the text must be included in a reference list at the end of the manuscript, and vice versa. Most author corrections at copy-editing and proof stage are connected to incorrect referencing. All these things should be checked thoroughly before submitting the manuscript. References in the bibliography should be set out as follows: Sridhar, Madabhusi (2013). The Deccan Chronicle. November 22, 2013.
- 13. Authorship: All parties who have made a substantive contribution to the article should be listed as authors. Principal authorship, authorship order, and other publication credits should be based on the relative or professional contributions of the individuals involved, regardless of their status. A student is usually listed as principal author on any multiple-authored publication that substantially derives from the student's thesis or dissertation.
- 14. Acknowledgements: All contributors who do not meet the criteria for authorship should be listed in a section designated 'Acknowledgements'. Examples of those who might be acknowledged include a person who provided purely technical help, or a department chair who provided only general support.
- 15. Information required for completing the submission: The author(s) are expected to provide contact details and academic affiliations for all co-authors via the submission system and identify who is to be the author for correspondence. These details must match what appears on the manuscript. At this stage please ensure that all the required statements and declarations and uploaded any additional supplementary files (including reporting guidelines where relevant) have been included.
